

- ❖ Position – Jr. Android Developer
- ❖ Experience – 3-5 years
- ❖ Compensation - Best in industry
- ❖ Open Positions - 1
- ❖ Location - Gurugram

As an Android Developer with 3+ years of experience, you will be a key contributor to our mobile app development team, responsible for designing, building, and maintaining cutting-edge Android applications. This role offers the opportunity to leverage your extensive Android development experience to create impactful and cutting-edge mobile applications while contributing to the success of our mobile app projects.

Eligibility Requirements

- Bachelor's degree in Computer Science, Software Engineering, or a related field.
- Minimum of 3 years of professional experience in Android app development.
- Proven track record of designing, developing, and maintaining high-quality Android applications.
- Strong expertise in Java or Kotlin programming languages.
- Proficiency in Android SDK, Android Studio, and related development tools.
- Extensive experience with mobile app architecture, design patterns, and best practices.
- Knowledge of RESTful APIs and integrating them into Android applications.
- Familiarity with version control systems (e.g., Git) and agile development methodologies.
- Strong problem-solving skills and the ability to work effectively in a collaborative team environment.
- Excellent communication and interpersonal skills.

Job Description & Responsibilities

- Design and develop robust, user-friendly Android applications using Java or Kotlin, ensuring high performance, scalability, and code quality.
- Implement modern mobile app architecture and design patterns to create maintainable and efficient code.
- Integrate with RESTful APIs to fetch and display data in the app, ensuring smooth user experiences.
- Identify and resolve bugs, performance bottlenecks, and other issues to enhance app stability and responsiveness.
- Conduct and participate in code reviews to maintain code quality and share knowledge within the development team.
- Utilize Git or other version control systems for source code management and collaborative development.
- Collaborate closely with cross-functional teams, including designers and backend developers, to ensure the successful integration of app features.
- Implement thorough testing and quality assurance processes to deliver bug-free and reliable Android applications.
- Create and maintain technical documentation for the codebase, ensuring clarity and ease of maintenance for future development.
- Stay updated on the latest Android technologies and industry trends, and apply this knowledge to enhance the app's features and performance.
- Tackle complex technical challenges and provide innovative solutions to deliver exceptional user experiences.

ViviRooms

ViviRooms Ecomm Private Limited

About us

We are a women-led, e-commerce platform, offering a concept that will revolutionize the online shopping experience. With an estimated launch in 2024, we will provide customers a chance to shop for clothes in a unique never before seen way. Phase one will focus on launch in the Indian market.

ViviRooms is part of London based Euromax Capital (www.euromaxcapital.com) among which includes the most innovative & promising Artificial Intelligence enabled Biometric Software Platform, Products & Solutions designing organizations Biocube Technologies (www.biocube.ai).
